

Task 1

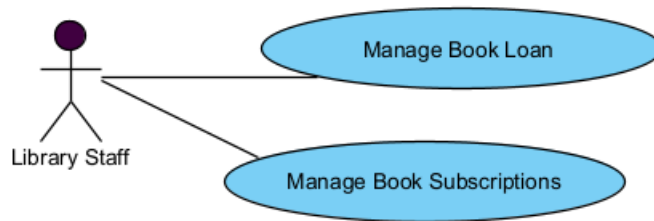

Carry out the “Writing a Use Case scenario with wireframe tutorial” provided in lab folder. On completion of this tutorial you should know how to create the flow of events for a use case and how to create a scenario-based wireframe. [refer to SampleLab4.vpSampleUsageScenarios.vp for an example of a use case scenario with flow of events and corresponding wireframe.]

**Task 2**

1. Create VP online account [Follow instructions provided in separate document]
2. Invite students you are assigned to work with as members to your account.
3. The Team member should create a VP project file and add assignment students as members to project. Name the file as follows **Lab4_Use Case Model**

The Project file can also be created using desktop application and saved in online repository as follows

1. Create a use case diagram illustrating an actor and 2 use cases for Library Management System [Lab3] Login should not be chosen.

2. Each student should select one use case and write a related usage scenario in the following format:

Role: Library Staff

Use case: Manage Book Loans

Scenario: Renewing a Book for a student

Scenario steps:

Mary received the Student's Library ID and Book Name, from a student that wants to renew their library book.

She goes to the "Book Loan" page.

She must input the students Library ID to access their files.

She then clicks on the book that the student wants to renew.

She checks to see that all is in order for the student to renew this library book.

She presses "Renew Book" once she is happy to renew the library book.

She tells the student the new return date.

She closes the program

3. Create the flow of events for two scenarios and supporting wireframes.

1. Retrieve the Book Name and Library ID from the student that wants to renew their Book.

2. Open the Manage Book Loans Page

3. Click on Renew Book button

4. SYSTEM Open the Renew Book page.

5. Input Student ID

6. SYSTEM Bring up Students Information

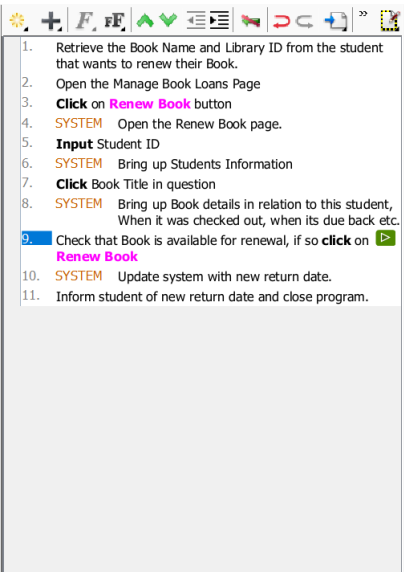

7. Click Book Title in question

8. SYSTEM Bring up Book details in relation to this student, When it was checked out, when its due back etc.

9. Check that Book is available for renewal, if so click on Renew Book

10. SYSTEM Update system with new return date.

11. Inform student of new return date and close program.

The screenshot shows a web application window with a title bar that says "Harry Potter" and a close button (X). The main content area is white and contains the following elements:

- A text box at the top containing "Student: John Smith" and "788541259".
- A section header "Harry Potter and the Chamber of Secrets - JK Rowling" in a grey bar.
- Below the header, a table with two columns: "Loan Date" and "Return Date".

Loan Date	Return Date
15/09/2024	29/09/2024
- Below the table, the text "*Any requests for Book - No".
- A "Renew Book" button at the bottom right.
